JAN ALEXANDER TOLENTINO

Technical Support • Client Communications • Unity Developer
Email: dev.jan.tolentino@gmail.com | Philippines

CAREER OBJECTIVE

Technically strong, communication-focused professional with hands-on experience supporting international (US-based) clients as a freelance virtual marketing assistant, backed by a Unity/C# development background in QA-driven production teams. Skilled at troubleshooting, managing client inboxes, documenting processes, and using AI tools to automate workflows. Seeking to bring a collaborative, fast-moving approach to the Support Manager role at VXT: resolving customer issues, writing clear escalations for engineers, and turning repeat questions into help articles and automations.

WORK EXPERIENCE

Freelance Virtual Marketing Assistant *May 2025 – Present*
Remote — US-Based Clients

- Main point of contact for US-based clients; managed inboxes and coordinated communications.
- Troubleshot client websites, booking systems and funnels, working each issue through to resolution.
- Built lead magnets, consultation funnels, booking systems, and business websites.
- Designed social graphics and branding assets; planned content calendars to keep brand identity consistent.
- Integrated AI tools (ChatGPT, Claude, Gemini, Leonardo AI, Midjourney) to automate creative workflows.

Game Environment Compositor / Artist / Coder *July 2023 – March 2025*
Holysoft Studios Philippines Inc. Bacolod City

- Developed and optimized Unity game environments (C#) for commercial projects.
- Investigated and fixed issues raised in QA feedback, iterating through production cycles.
- Collaborated with programmers, artists, and designers, tracking tasks and bugs in HacknPlan.
- Created environmental VFX including fog, god rays, wind, and weather effects.

Programmer / Game Environment Compositor (Internship) *January 2023 – May 2023*
Holysoft Studios Philippines Inc. Bacolod City

- Assembled Unity environments to match the game's visual style and created particle VFX (fog, wind trails, raindrops).
- Integrated 3D assets into the game world in collaboration with asset creators.
